Gary

This is our org chart. The ERDC director is Dr. Jeff Holland, the Commander COL Bryan S. Green, and El director is Dr. Beth Fleming; phones are in the org chart.

Thanks

carlos

Gary - We want to follow up on with you on the subject document in regards to your and Carlos's request that we look at all of the past survey track lines through that area to see if we can identify when the disturbance likely took place. That request came out of our phone call with you, me, Wendell and Carlos a couple of weeks ago.

The attached shows two sections through the area of concern with profiles from the different survey events that occurred following the original cap construction in August 2011 through October 2015. Section B-B' in particular shows that the surface of the cap was stable from construction through October 2013, and there is an apparent deflection of about 1 foot in the center of the area in the following July 2014 survey. To us, this indicates that some type of impact occurred between October 2013, and July 2014, and the disturbance is not likely related to a construction defect.

Please consider this information as you finalize the Damage Assessment, and let us know if you would like to discuss anything further.

Thank you,

David

David Keith
